

LED Tracks lights work for you by acting on the following advantages over traditional lighting systems for both the buyer and consumer.

They offer huge energy efficiency whilst also maintaining quality in light performance and due to the long lasting nature of LED's they also offer low operational & replacement costs. Furthermore LEDs produce very little to no UV and will illuminate instantly when turned on. LED track lighting systems are modern, bright, cost effective and powerful offering intense, defining light which is ideal for the illumination of displays and general lighting applications. Due to lower carbon consumption LED track lights also offer complete compliance with local authorities

Warranty: 3 years

Dimmable

Specification

Operational Voltage	AC85V~265V
Power Consumption	15W
Beam Angle Range	24° ~ 60°
Color Temperature	2700K~5000K
CRI	Ra=80~90
Weight	311g
Intensity of Light Output	810lm~1000lm
Driver	Include
Expected Life	50,000hours
Rating	IP64

Beam Angle Range from
24° ~ 60°
